Full Stack Developer with a background in banking, business, and digital marketing, this experience allowed me to gain a deep understanding of banking and administrative processes and helped me to develop soft skills like teamwork, results orientation, leadership, time management, and self-discipline.

I specialize on business adapted solutions development, using Front-end tools (HTML, CSS, Wordpress React, Nextjs, Vite, Redux, Zustand), Back-end (Express, Node) and database (Sequelize, Prisma, PostgreSQL, MySQL, MongoDB), into Agile environments.

EXPERIENCE:

Full Stack Developer

Soluciones Star. Medellín – Colombia (Full time – remote)   apr 2024 – Present

- Developed and assisted in multiple projects such as landing pages and responsive web applications, primarily focused on the frontend area using WordPress and plugins such as Elementor, SiteOrigin page builder, AOS animations, among others.

- Developed projects with Vite, React, and style libraries such as MUI and TailwindCSS, GSAP animations, and state management with Redux toolkit and Zustand, all following UX/UI guidelines established in the Figma designs provided by the design area.

Full Stack Developer   nov 2023 – feb 2024

Personal project at Buime. Medellin – Colombia (on site).

Project: Buime.

Deploy: https://buime-ecommerce.vercel.app/

Complete e-commerce project developed with NextJS which consume Fake store API to render products. This project includes several features like third-party auth, paginated, search bar, shopping cart and payment runway among others.
