Portfolio: *https://ivantrejo.vercel.app/*

Github: *https://github.com/ivantrejoc*

Full Stack Developer with a background in banking, business, and digital marketing, which helped me develop soft skills like teamwork, results orientation, leadership, time management, and self-discipline.

I specialize on business adapted solutions development, using frontend tools (HTML, CSS, React, Redux y tailwindCSS). Back-end (Express, Node) and Databases (Sequelize, MongoDB), into Agile enviroments.

EXPERIENCE:

Full Stack Web Developer   July 2023 – August 2023

Academic experience at Henry Bootcamp. Buenos Aires – Argentina (remote)

Project: Wanderlust.

Deploy: https://wanderlust-phi.vercel.app/

Turism E-commerce. My main contribution was development routes and controllers into backend, paypal payment runway integration, support on frontend admin views. Features: Destination search, filters, sorts, third-party athentication, shopping cart, payment runway, travel schedule.

Junior Full Stack Developer   mar 2023 – jun 2023

Henry Bootcamp (academic experience). Buenos Aires, Argentina (remote).

Project: Pokemon

Deploy: https://pokemonivan.vercel.app

App to render and create Pokemon characters. Features: landing, filters, sorts, characters search, character creation form, DBB to characters storage, Pokemon API connection from backend.

Junior Full Stack Developer   nov 2022 – jan 2023

Henry Bootcamp (academic experience). Buenos Aires, Argentina (remote).

Project: Rick and Morty

Repository: https://github.com/ivantrejoc/rick_and_morty.git

App to render Rick and Morty characters. Features: login, filters, sorts, random button, characters search, R&M API connection from frontend.
